Architectural Statement: <i>This two-story, vermillion colored brick corner building is accented with cream brick panels and capped with a brickwork cornice with a rounded central accent. The storefront has, however, been substantially altered in the early to mid 20th century in a manner incompatible with the building's original architectural character. It remains, however, as a contributive element to the architectural significance of the District, because of the early detailing which remains.</i>		Historical Statement:
